

We are excited to announce that ConnectingOntario is coming to Punjabi Community Health Services (pchs)!

Clinical Staff at pchs will soon have access to ConnectingOntario – the provincial Electronic Health Record (EHR) initiative that is delivering faster, better patient care. We are expected to go live on January 20, 2017!

ConnectingOntario helps clinical staff gather background information on new clients or support clients who may have been at a hospital but are not able to provide details about their medical history.

ConnectingOntario Benefits – Why Clinicians Use ConnectingOntario

- More accurate picture of client's journey through the health care system
- More timely access to acute and community client information
- Access to client information not available previously expedites client follow-up and support
- Better able to anticipate client's future requirements

Pchs would like to acknowledge the work of the ConnectingOntario Project Team at pchs in launching ConnectingOntario. We would also like to recognize the support of Sunnybrook Hospital implementation team for ConnectingOntario, who together helped the ConnectingOntario project to successful launch.

As pchs continues to strive for better client care and more internal efficiencies, it is very gratifying to know that the implementation of ConnectingOntario will make a significant difference to the well-being of our clients and our daily workflow. This is indeed a milestone to be proud of.

Sincerely,

pchs Executive Team
